Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Quadruple Spherical Harmonics Approximation for Radiative Transfer in Two-Dimensional Rectangular Enclosures T89-043

Aerospace Plane

Aerothermodynamic Study of Slender Conical Vehicles T89-059

Energy

Magnetohydrodynamic Power Generation

Electromagnetic Levitation with Acoustic Modulation for Property Measurement T89-055

Nuclear Fission

Convective Heat Transfer with Multiflow in an Annular Pipe of Circular Cross Section T89-015

Rotating Machinery

Buoyant Convection Driven by an Encapsuled Spinning Disk with Axial Suction T89-030

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Mixed Convection on a Horizontal Surface with Injection or Suction T89-078
Thermal Boundary Layer Due to Sudden Heating of Fluid T89-075
Performance Evaluation of Multipassage Tubes for Laminar Flow Applications T89-074
Laminar Natural Convection in a High-Aspect-Ratio Inclined Rectangular Duct T89-070
Swaying Motion in Thermal Plume Above a Horizontal Line Heat Source T89-069
Solidification Heat Transfer on a Moving Continuous Cylinder T89-058
Convective Instabilities During Directional Solidification T89-054
Recirculating Mixed Convection Flows in Rectangular Cavities T89-051
Buoyant Convection Driven by an Encapsuled Spinning Disk with Axial Suction T89-030
Effects of Wetted Wall on Laminar Mixed Convection in a Vertical Channel T89-017
Convective Heat Transfer with Multiflow in an Annular Pipe of Circular Cross Section T89-015
Examination of an Analogy Toward the Understanding of Thermal Lens Oscillations T89-004

Boundary Layers and Heat Transfer—Turbulent

Pressure Drop and Mass Transfer in Two-Pass Ribbed Channels T89-050
Development of a Special-Purpose Test Surface Guided by Uncertainty Analysis T89-003

Boundary-Layer Stability and Transition

Examination of an Analogy Toward the Understanding of Thermal Lens Oscillations T89-004
Development of a Special-Purpose Test Surface Guided by Uncertainty Analysis T89-003

Computational Fluid Dynamics

Thermal Boundary Layer Due to Sudden Heating of Fluid T89-075
Monte Carlo Analysis of Wall Erosion and Direct Contact Heat Transfer by Impinging Two-Phase Jets T89-020
Analysis of Artificial Viscosity Effects on Reacting Flows Using a Spectral Multidomain Technique T89-002
Monte Carlo Simulation of Rarefied Flow Along a Flat Plate T89-001

Hydrodynamics

Thermocapillary Migration of a Large Gas Slug in a Tube T89-014

Hypersonic Flow

Approximations for Hypervelocity Nonequilibrium Radiating, Reacting, and Conducting Stagnation Regions T89-062
Aerothermodynamic Study of Slender Conical Vehicles T89-059
Implicit Flux-Split Algorithm to Calculate Hypersonic Flowfields in Chemical Equilibrium T89-035
Numerical Models of Two Complex Hypersonic Flowfields T89-018

Inlet, Nozzle, Diffusor, and Channel Flows

Performance Evaluation of Multipassage Tubes for Laminar Flow Applications T89-074
Convection-Radiation Interaction in Buoyancy-Induced Channel Flow T89-028

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Monte Carlo Analysis of Wall Erosion and Direct Contact Heat Transfer by Impinging Two-Phase Jets T89-020

Multiphase Flows

New Data on Two-Phase, Two-Component Heat Transfer and Hydrodynamics in a Vertical Tube T89-033
Thermal Stability in Evaporating Liquid Disks by Local Potential Technique T89-031
Monte Carlo Analysis of Wall Erosion and Direct Contact Heat Transfer by Impinging Two-Phase Jets T89-020
Thermocapillary Migration of a Large Gas Slug in a Tube T89-014

Rarefied Flows

Transient Energy Transfer by Conduction and Radiation in Nongray Gases T89-027
Monte Carlo Simulation of Rarefied Flow Along a Flat Plate T89-001

Reacting Flows and Combustion

Numerical Simulation of Unsteady Flows Generated by Dissociating Nitrogen Diffusion T89-041
Chemistry Associated with Hypersonic Vehicles T89-040
Analysis of Artificial Viscosity Effects on Reacting Flows Using a Spectral Multidomain Technique T89-002

Shock Waves and Detonations

Analysis of Artificial Viscosity Effects on Reacting Flows Using a Spectral Multidomain Technique T89-002

Supersonic Flow

Monte Carlo Simulation of Rarefied Flow Along a Flat Plate T89-001

Unsteady Flows

Swaying Motion in Thermal Plume Above a Horizontal Line Heat Source T89-069

Vortices

Computation of Laminar Mixed Convection Flow in a Channel with Wing Type Built-in Obstacles T89-072

Guidance, Control, and Dynamics Technology

System Identification

Nonlinear Inverse Problem for the Estimation of Time-and-Space-Dependent Heat-Transfer Coefficients T89-024

Interdisciplinary Topics

Aerospace Management

Evaluation of Thermal and Kinetic Properties Suitable for High Heating Rate Computations T89-064
Ablation with a Large Fraction of Solid Removal T88-046

Analytical and Numerical Methods

Evaluation of Thermal and Kinetic Properties Suitable for High Heating Rate Computations T89-064
Recirculating Mixed Convection Flows in Rectangular Cavities T89-051
Conjugate Heat Transfer in Channels with Internal Longitudinal Fins T89-048
Unsteady Surface-Element Method Applied to Mixed-Boundary Conditions with Accuracy Study T89-047
Nonlinear Inverse Problem for the Estimation of Time-and-Space-Dependent Heat-Transfer Coefficients T89-024
Heat Transfer in Gas Turbine Combustors T89-021
Convective Heat Transfer with Multiflow in an Annular Pipe of Circular Cross Section T89-015
Numerical Simulation of Laser Ablation with Cavity Reflections T89-006

Lasers and Laser Applications

Thermal Boundary Layer Due to Sudden Heating of Fluid T89-075
CO_2 Laser Absorption in SF_6-Air Boundary Layers T89-056
Convective Instabilities During Directional Solidification T89-054
Measurement of Surface Temperatures and Spectral Emissivities During Laser Irradiation T89-025
Numerical Simulation of Laser Ablation with Cavity Reflections T89-006

Sensor Systems

Optimal Regularization of the Inverse Heat-Conduction Problem T89-068

Launch Vehicle and Missile (LV/M) Technology

Aerodynamics

Numerical Simulation of Unsteady Flows Generated by Dissociating Nitrogen Diffusion T89-041

Propulsion

Combustion and Combustor Designs

Effect of Radiative Heat Transfer on Thermal Ignition T89-042
Approximate Method for Transient Conduction in Arbitrarily Shaped Solids with a Volumetric Heat Source T89-037
Thermal Stability in Evaporating Liquid Disks by Local Potential Technique T89-031
Transient Energy Transfer by Conduction and Radiation in Nongray Gases T89-027

Hybrid Rocket Engines

Radiation-Stagnation Flow Model Aluminized Solid Rocket Motor Internal Insulator Heat Transfer T89-022

Liquid Rocket Engines and Missile Systems

Pressure Rise in a Liquid Fuel Tank Owing to Volumetric Heating T89-023

Solid Rocket Motors and Missile Systems

Radiation-Stagnation Flow Model Aluminized Solid Rocket Motor Internal Insulator Heat Transfer T89-022

Space Technology

Aerobraking Configurations/ Aerothermodynamics

Numerical Models of Two Complex Hypersonic Flowfields T89-018

Space Experiments

Ablation with a Large Fraction of Solid Removal T88-046

Structural Mechanics and Materials

Structural Composite Materials

Predicting the Thermal Conductivity and Temperature Distribution in Aligned Fiber Composites T89-067

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Energy Deposition Phenomena in Partially Transparent Solids T89-026
Ablation with a Large Fraction of Solid Removal T88-046

Aerothermodynamics/Thermal Protection

Approximations for Hypervelocity Nonequilibrium Radiating, Reacting, and Conducting Stagnation Regions T89-062
Sensitivity of Hypersonic Flow to Wall/Gas Interaction Models Using DSMC T89-061
Grid Generation and Adaptation for the Direct Simulation Monte Carlo Method T89-060
Aerothermodynamic Study of Slender Conical Vehicles T89-059
Assessment of Two-Temperature Kinetic Model for Ionizing Air T89-039
Implicit Flux-Split Algorithm to Calculate Hypersonic Flowfields in Chemical Equilibrium T89-035
Numerical Models of Two Complex Hypersonic Flowfields T89-018

Computational Heat Transfer

Computation of Laminar Mixed Convection Flow in a Channel with Wing Type Built-in Obstacles T89-072
Optimal Regularization of the Inverse Heat-Conduction Problem T89-068
Grid Generation and Adaptation for the Direct Simulation Monte Carlo Method T89-060
Modified Differential Approximation for Radiative Transfer in General Three-Dimensional Media T89-045
Directional Emittance of a Two-Dimensional Scattering Medium with Fresnel Boundaries T89-044
Deforming Grid Method Applied to the Inverse Problem of Heat Conduction T89-036
Integral Equations for Radiative Transfer with Linear Anisotropic Scattering and Fresnel Boundaries T89-010

Cryogenics

Space Cryogenics Components Based on the Thermomechanical Effect: Vapor-Liquid Phase Separation T89-066
Numerical Modeling of Helium-II in Forced Flow Conditions T89-032
Scaled Total Hemispherical Emittance of Particle-Gas Layers T89-009
Radiative Cooling Performance of a Converging Liquid Drop Radiatior T89-007

Heat Conduction

Experimental Results for the Quasisteady Heat Transfer Through Periodically Contacting Surfaces T89-077
Optimal Regularization of the Inverse Heat-Conduction Problem T89-068
Predicting the Thermal Conductivity and Temperature Distribution in Aligned Fiber Composites T89-067
Melting of a Semitransparent Polymer Under Cyclic Constant Axial Stress T89-057
Analytical and Experimental Investigation of Melting Heat Transfer T89-052
Unsteady Surface-Element Method Applied to Mixed-Boundary Conditions with Accuracy Study T89-047
Approximate Method for Transient Conduction in Arbitrarily Shaped Solids with a Volumetric Heat Source T89-037
Deforming Grid Method Applied to the Inverse Problem of Heat Conduction T89-036
Nonlinear Inverse Problem for the Estimation of Time-and-Space-Dependent Heat-Transfer Coefficients T89-024
Combined Conduction and Radiation Heat Transfer in Concentric Cylindrical Media T89-011

Heat Pipes

VCHP Performance Prediction: Comparison of First-Order and Flat Front Models T89-065
Enhancement of Film Condensation Using Porous Fins T89-049
Variable Conductance Heat Pipe Performance Analysis: Zero-to-Full Load T89-005

Melting/Solidification

Solidification by Radiative Cooling of a Cylindrical Region Filled with Drops T89-053
Convection Heat Transfer in Water at 4°C Past Vertical Slender Cylinders T89-034

Mixed Convection

Mixed Convection on a Horizontal Surface with Injection or Suction T89-078
Turbulent Mixed Flow of Free and Forced Convection Between Vertical Parallel Plates T89-073
Computation of Laminar Mixed Convection Flow in a Channel with Wing Type Built-in Obstacles T89-072
Transient Cool Down of a Gas in a Closed Container T89-071
Convection Heat Transfer in Water at 4°C Past Vertical Slender Cylinders T89-034
Friction Coefficients for Flow in Pipes with Mass Injection and Extraction T89-016

Natural Convection

Turbulent Mixed Flow of Free and Forced Convection Between Vertical Parallel Plates T89-073
Transient Cool Down of a Gas in a Closed Container T89-071
Swaying Motion in Thermal Plume Above a Horizontal Line Heat Source T89-069
Convection Heat Transfer in Water at 4°C Past Vertical Slender Cylinders T89-034
Natural Convection of a Variable Property Gas in Asymmetrically Heated Square Cavities T89-013

Nonintrusive Diagnostics

Convective Instabilities During Directional Solidification T89-054
Natural Convection of Air Layers in Vertical Annuli with Cooled Outer Wall T89-029
Measurement of Surface Temperatures and Spectral Emissivities During Laser Irradiation T89-025
3500-K High-Frequency Induction-Heated Blackbody Source T89-012

Radiation in Participating Media

Solidification by Radiative Cooling of a Cylindrical Region Filled with Drops T89-053
Modified Differential Approximation for Radiative Transfer in General Three-Dimensional Media T89-045
Directional Emittance of a Two-Dimensional Scattering Medium with Fresnel Boundaries T89-044
Assessment of Two-Temperature Kinetic Model for Ionizing Air T89-039
Integral Equations for Radiative Transfer with Linear Anisotropic Scattering and Fresnel Boundaries T89-010
Scaled Total Hemispherical Emittance of Particle-Gas Layers T89-009
Radiative Cooling Performance of a Converging Liquid Drop Radiator T89-007

Radiation Interchange Between Surfaces

Experimental Study of the Hypersonic Turbulent Boundary Layer on a Cold Slender Cone T89-019
3500-K High-Frequency Induction-Heated Blackbody Source T89-012

Thermal Control

VCHP Performance Prediction: Comparison of First-Order and Flat Front Models T89-065
Solidification by Radiative Cooling of a Cylindrical Region Filled with Drops T89-053
Enhancement of Film Condensation Using Porous Fins T89-049
Engineering Model of Surface Specularity: Spacecraft Design Implications T89-046
Natural Convection of Air Layers in Vertical Annuli with Cooled Outer Wall T89-029
Radiative Cooling Performance of a Converging Liquid Drop Radiator T89-007
Variable Conductance Heat Pipe Performance Analysis: Zero-to-Full Load T89-005

Thermal Modeling and Analysis

Laminar Natural Convection in a High-Aspect-Ratio Inclined Rectangular Duct T89-070
Predicting the Thermal Conductivity and Temperature Distribution in Aligned Fiber Composites T89-067
Space Cryogenics Components Based on the Thermomechanical Effect: Vapor-Liquid Phase Separation T89-066
VCHP Performance Prediction: Comparison of First-Order and Flat Front Models T89-065
Analytical and Experimental Investigation of Melting Heat Transfer T89-052
Conjugate Heat Transfer in Channels with Internal Longitudinal Fins T89-048
Modified Differential Approximation for Radiative Transfer in General Three-Dimensional Media T89-045
Effect of Radiative Heat Transfer on Thermal Ignition T89-042
Approximate Method for Transient Conduction in Arbitrarily Shaped Solids with a Volumetric Heat Source T89-037
Deforming Grid Method Applied to the Inverse Problem of Heat Conduction T89-036
Numerical Modeling of Helium-II in Forced Flow Conditions T89-032
Thermal Stability in Evaporating Liquid Disks by Local Potential Technique T89-031
Natural Convection of Air Layers in Vertical Annuli with Cooled Outer Wall T89-029
Experimental Study of the Hypersonic Turbulent Boundary Layer on a Cold Slender Cone T89-019
Scaled Total Hemispherical Emittance of Particle-Gas Layers T89-009
Variable Conductance Heat Pipe Performance Analysis: Zero-to-Full Load T89-005

Thermochemistry and Chemical Kinetics

Approximations for Hypervelocity Nonequilibrium Radiating, Reacting, and Conducting Stagnation Regions T89-062
Electromagnetic Levitation with Acoustic Modulation for Property Measurement T89-055
Engineering Model of Surface Specularity: Spacecraft Design Implications T89-046
Numerical Simulation of Unsteady Flows Generated by Dissociating Nitrogen Diffusion T89-041
Chemistry Associated with Hypersonic Vehicles T89-040
Assessment of Two-Temperature Kinetic Model for Ionizing Air T89-039
Implicit Flux-Split Algorithm to Calculate Hypersonic Flowfields in Chemical Equilibrium T89-035

Thermophysical Properties

Melting of a Semitransparent Polymer Under Cyclic Constant Axial Stress T89-057
Electromagnetic Levitation with Acoustic Modulation for Property Measurement T89-055
Directional Emittance of a Two-Dimensional Scattering Medium with Fresnel Boundaries T89-044
Experimental Study of the Hypersonic Turbulent Boundary Layer on a Cold Slender Cone T89-019
3500-K High-Frequency Induction-Heated Blackbody Source T89-012
Integral Equations for Radiative Transfer with Linear Anisotropic Scattering and Fresnel Boundaries T89-010
Scaled Total Hemispherical Emittance of Particle-Gas Layers T89-009
Infrared Optical Constants of Coal Slags: Dependence on Chemical Composition T89-008
Radiative Cooling Performance of a Converging Liquid Drop Radiator T89-007

Chronological Index

T88-046 Ablation with a Large Fraction of Solid Removal. George Y. Jumper Jr., *Worcester Polytechnic Institute*; and James E. Hitchcock, *Air Force Institute of Technology, Wright-Patterson AFB* (2, 3, p. 264) Article

Errata by George Y. Jumper Jr., *Worcester Polytechnic Institute*; and James E. Hitchcock, *Air Force Institute of Technology, Wright-Patterson AFB* (2, 2, p. 232)

T89-001 Monte Carlo Simulation of Rarefied Flow Along a Flat Plate. W. L. Hermina, *Sandia National Laboratories* (3, 1, p. 7) Article based on AIAA Paper 87-1547

T89-002 Analysis of Artificial Viscosity Effects on Reacting Flows Using a Spectral Multidomain Technique. Michéle G. Macaraeg and Craig L. Streett, *NASA Langley Research Center*; and M. Y. Hussaini, *Institute for Computer Applications in Science and Engineering* (3, 1, p. 13) Article based on AIAA Paper 87-1183

T89-003 Development of a Special-Purpose Test Surface Guided by Uncertainty Analysis. T. Wang, *Clemson University*; and T. W. Simon, *University of Minnesota* (3, 1, p. 19) Article based on AIAA Paper 88-0169

T89-004 Examination of an Analogy Toward the Understanding of Thermal Lens Oscillations. G. Gouesbet, *Laboratoire d'Energétique des Systèmes et Procédés, France*; and J. Maquet, *Laboratoire d'Energétique des Systèmes et Procédés, France* (3, 1, p. 27) Article based on AIAA Paper 87-1642

T89-005 Variable Conductance Heat Pipe Performance Analysis: Zero-to-Full Load. Richard P. Bobco, *Hughes Aircraft Company* (3, 1, p. 33) Article based on AIAA Paper 87-1614

T89-006 Numerical Simulation of Laser Ablation with Cavity Reflections. A. W. Bailey and A. Modak, *Physical Sciences, Inc.* (3, 1, p. 42) Article

T89-007 Radiative Cooling Performance of a Converging Liquid Drop Radiator. Robert Siegel, *NASA Lewis Research Center* (3, 1, p. 46) Article

T89-008 Infrared Optical Constants of Coal Slags: Dependence on Chemical Composition. D. G. Goodwin and M. Mitchner, *Stanford University* (3, 1, p. 53) Article

T89-009 Scaled Total Hemispherical Emittance of Particle-Gas Layers. HaeOk Lee, *University of Minnesota* (3, 1, p. 61) Article based on AIAA Paper 87-1486

T89-010 Integral Equations for Radiative Transfer with Linear Anisotropic Scattering and Fresnel Boundaries. Chih-Yang Wu, *National Cheng Kung University, Taiwan, ROC* (3, 1, p. 68) Article

T89-011 Combined Conduction and Radiation Heat Transfer in Concentric Cylindrical Media. D. K. Pandey, *Information & Control Systems, Inc.* (3, 1, p. 75) Article based on AIAA Paper 87-1524

T89-012 3500-K High-Frequency Induction-Heated Blackbody Source. Shijie Gu, Guoyi Fu and Qiren Zhang, *China Aerodynamic Research and Development Center* (3, 1, p. 83) Technical Note based on AIAA Paper 86-1282

T89-013 Natural Convection of a Variable Property Gas in Asymmetrically Heated Square Cavities. Bakhtier Farouk and Toru Fusegi, *Drexel University* (3, 1, p. 85) Technical Note

T89-014 Thermocapillary Migration of a Large Gas Slug in a Tube. M. M. Hasan and R. Balasubramaniam, *NASA Lewis Research Center* (3, 1, p. 87) Technical Note

T89-015 Convective Heat Transfer with Multiflow in an Annular Pipe of Circular Cross Section. M. A. Ebadian, *Florida International University* (3, 1, p. 89) Technical Note

T89-016 Friction Coefficients for Flow in Pipes with Mass Injection and Extraction. Jerry Bowman, *U. S. Air Force Academy*; and James Hitchcock, *Air Force Institute of Technology* (3, 1, p. 92) Technical Note based on AIAA Paper 87-0657 CP871

T89-017 Effects of Wetted Wall on Laminar Mixed Convection in a Vertical Channel. W. M. Yan and T. F. Lin, *National Chiao Tung University, Taiwan, ROC* (3, 1, p. 94) Technical Note

T89-018 Numerical Models of Two Complex Hypersonic Flowfields. M. G. Macaraeg, *NASA Langley Research Center* (3, 2, p. 97) Article based on AIAA Paper 86-0234

T89-019 Experimental Study of the Hypersonic Turbulent Boundary Layer on a Cold Slender Cone. Z. B. Lin, *Chinese Academy of Science*; and J. K. Harvey, *Imperial College, England, UK* (3, 2, p. 105) Article based on AIAA Paper 87-1513

T89-020 Monte Carlo Analysis of Wall Erosion and Direct Contact Heat Transfer by Impinging Two-Phase Jets. Amir Kitron, Tov Elperin and Abraham Tamir, *Ben Gurion University of the Negev, Israel* (3, 2, p. 112) Article

T89-021 Heat Transfer in Gas Turbine Combustors. Maria da Graça Carvalho and Pedro Jorge Coelho, *Instituto Superior Tècnico, Portugal* (3, 2, p. 123) Article

T89-022 Radiation-Stagnation Flow Model Aluminized Solid Rocket Model Internal Insulator Heat Transfer. M. Q. Brewster, *University of Illinois at Urbana-Champaign* (3, 2, p. 132) Article based on AIAA Paper 88-0088

T89-023 Pressure Rise in a Liquid Fuel Tank Owing to Volumetric Heating. W. B. Bush, F. E. Fendell and L. P. Muirhead, *TRW* (3, 2, p. 140) Article

T89-024 Nonlinear Inverse Problem for the Estimation of Time-and-Space-Dependent Heat-Transfer Coefficients. A. M. Osman and J. V. Beck, *Michigan State University* (3, 2, p. 146) Article

T89-025 Measurement of Surface Temperatures and Spectral Emissivities During Laser Irradiation. David P. DeWitt, *Purdue University*; and Roger E. Rondeau, *U. S. Air Force Wright Aeronautical Laboratories, Wright-Patterson AFB* (3, 2, p. 153) Article based on AIAA Paper 87-1565

T89-026 Energy Deposition Phenomena in Partially Transparent Solids. J. A. Nemes and P. W. Randles, *U. S. Naval Research Laboratory* (3, 2, p. 160) Article

T89-027 Transient Energy Transfer by Conduction and Radiation in Nongray Gases. S. N. Tiwari and D. J. Singh, *Old Dominion University*; and A. Kumar, *NASA Langley Research Center* (3, 2, p. 167) Article

T89-028 Convection-Radiation Interaction in Buoyancy-Induced Channel Flow. A. Moutsoglou and Y. H. Wong, *South Dakota State University* (3, 2, p. 175) Article

T89-029 Natural Convection of Air Layers in Vertical Annuli with Cooled Outer Wall. Shou-Shing Hsieh, Wen-San Han and Shyi-Ching Lin, *National Sun Yat-Sen University, Taiwan, ROC* (3, 2, p. 182) Article

T89-030 Buoyant Convection Driven by an Encapsuled Spinning Disk with Axial Suction. Jae Min Hyun and Jae Won Kim, *Korea Advanced Institute of Science and Technology* (3, 2, p. 189) Article

T89-031 Thermal Stability in Evaporating Liquid Disks by Local Potential Technique. Nengli Zhang and Zhihong Jiang, *Tsinghua University, China*; and Wen-Jei Yang, *University of Michigan* (3, 2, p. 195) Article

T89-032 Numerical Modeling of Helium-II in Forced Flow Conditions. Y. S. Ng, J. H. Lee and W. F. Brooks, *NASA Ames Research Center* (3, 2, p. 203) Article based on AIAA Paper 87-1495

T89-033 New Data on Two-Phase, Two-Component Heat Transfer and Hydrodynamics in a Vertical Tube. Kamiel S. Rezkallah and Grant E. Sims, *University of Manitoba, Canada* (3, 2, p. 213) Article based on AIAA Paper 87-1631

T89-034 Convection Heat Transfer in Water at 4°C Past Vertical Slender Cylinders. C. Kleinstreuer and Tian-Yih Wang, *North Carolina State University* (3, 2, p. 220) Technical Note

T89-035 Implicit Flux-Split Algorithm to Calculate Hypersonic Flowfields in Chemical Equilibrium. Grant Palmer, *NASA Ames Research Center* (3, 2, p. 223) Technical Note based on AIAA Paper 87-1580

T89-036 Deforming Grid Method Applied to the Inverse Problem of Heat Conduction. R. C. Mehta and T. Jayachandran, *Vikram Sarabhai Space Centre, India* (3, 2, p. 225) Technical Note

T89-037 Approximate Method for Transient Conduction in Arbitrarily Shaped Solids with a Volumetric Heat Source. K. Taghavi and R. A. Altenkirch, *University of Kentucky* (3, 2, p. 228) Technical Note

T89-039 Assessment of Two-Temperature Kinetic Model for Ionizing Air. Chul Park, *NASA Ames Research Center* (3, 3, p. 233) Article based on AIAA Paper 87-1547

T89-040 Chemistry Associated with Hypersonic Vehicles. Thomas R. A. Bussing, *Boeing Military Airplane Company*; and Scott Eberhardt, *University of Washington* (3, 3, p. 245) Article

T89-041 Numerical Simulation of Unsteady Flows Generated by Dissociating Nitrogen Diffusion. Lionel Marraffa, *Office National d'Etudes et de Recherches Aèronautiques, France*; George S. Dulikravich, *Pennsylvania State University*; and George S. Deiwert, *NASA Ames Research Center* (3, 3, p. 254) Article based on AIAA Paper 87-2549 CP875

T89-042 Effect of Radiative Heat Transfer on Thermal Ignition. W. W. Yuen and S. H. Zhu, *University of California, Santa Barbara* (3, 3, p. 260) Article

T89-043 Quadruple Spherical Harmonics Approximation for Radiative Transfer in Two-Dimensional Rectangular Enclosures. R. K. Iyer and M. P. Mengüc, *University of Kentucky* (3, 3, p. 266) Article

T89-044 Directional Emittance of a Two-Dimensional Scattering Medium with Fresnel Boundaries. C. Y. Wu, W. H. Sutton and T. J. Love, *University of Oklahoma* (3, 3, p. 274) Article

T89-045 Modified Differential Approximation for Radiative Transfer in General Three-Dimensional Media. Michael F. Modest, *Pennsylvania State University* (3, 3, p. 283) Article based on AIAA Paper 88-0600

T89-046 Engineering Model of Surface Specularity: Spacecraft Design Implications. R. P. Bobco and B. L. Drolen, *Hughes Aircraft Company* (3, 3, p. 289) Article based on AIAA Paper 88-2723

T89-047 Unsteady Surface-Element Method Applied to Mixed-Boundary Conditions with Accuracy Study. B. Litkouhi, *University of Waterloo, Canada*; J. V. Beck, *Michigan State University*; and M. H. N. Naraghi, *Manhattan College* (3, 3, p. 297) Article based on AIAA Paper 87-1554

T89-048 Conjugate Heat Transfer in Channels with Internal Longitudinal Fins. S. C. Lau, L. E. Ong and J. C. Han, *Texas A&M University* (3, 3, p. 303) Article based on AIAA Paper 87-1644

T89-049 Enhancement of Film Condensation Using Porous Fins. A. Shekarriz and O. A. Plumb, *Washington State University* (3, 3, p. 309) Article based on AIAA Paper 88-0260

T89-050 Pressure Drop and Mass Transfer in Two-Pass Ribbed Channels. P. R. Chandra and J. C. Han, *Texas A&M University* (3, 3, p. 315) Article

T89-051 Recirculating Mixed Convection Flows in Rectangular Cavities. Ranganathan Kumar and Tsorng-Dih Yuan, *Clemson University* (3, 3, p. 321) Article

T89-052 Analytical and Experimental Investigation of Melting Heat Transfer. C. Wen, J. W. Sheffield and M. P. O'Dell, *University of Missouri-Rolla*; and J. E. Leland, *Air Force Wright Aeronautical Laboratories, Wright-Patterson AFB* (3, 3, p. 330) Article

T89-053 Solidification by Radiative Cooling of a Cylindrical Region Filled with Drops. Robert Siegel, *NASA Lewis Research Center* (3, 3, p. 340) Article

T89-054 Convective Instabilities During Directional Solidification. T. D. McCay, M. H. McCay, S. A. Lowry and L. M. Smith, *University of Tennessee Space Institute* (3, 3, p. 345) Article based on AIAA Paper 88-0258

T89-055 Electromagnetic Levitation with Acoustic Modulation for Property Measurement. Yildiz Bayazitoglu and P. V. R. Suryanarayana, *Rice University* (3, 3, p. 351) Technical Note

T89-056 CO_2 Laser Absorption in SF_6-Air Boundary Layers. H. F. Nelson, *University of Missouri-Rolla*; and E. A. Eiswirth, *McDonnell Douglas* (3, 3, p. 353) Technical Note

T89-057 Melting of a Semitransparent Polymer Under Cyclic Constant Axial Stress. I. S. Habib, *University of Michigan-Dearborn* (3, 3, p. 355) Technical Note based on AIAA Paper

T89-058 Solidification Heat Transfer on a Moving Continuous Cylinder. F. B. Cheung and S. W. Cha, *Pennsylvania State University* (3, 3, p. 358) Technical Note based on AIAA Paper 88-2642

T89-059 Aerothermodynamic Study of Slender Conical Vehicles. R. A. Thompson, K. E. Wurster, E. V. Zoby and P. A. Gnoffo, *NASA Langley Research Center* (3, 4, p. 361) Article based on AIAA Paper 87-1475

T89-060 Grid Generation and Adaptation for the Direct Simulation Monte Carlo Method. David P. Olynick, *North Carolina State University*; James N. Moss, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (3, 4, p. 368) Article based on AIAA Paper 88-2734

T89-061 Sensitivity of Hypersonic Flow to Wall/Gas Interaction Models Using DSMC. F. C. Hurlbut, *University of California, Berkeley* (3, 4, p. 374) Article based on AIAA Paper 87-1545

T89-062 Approximations for Hypervelocity Nonequilibrium Radiating, Reacting, and Conducting Stagnation Regions. Leland A. Carlson, *Texas A&M University* (3, 4, p. 380) Article based on AIAA Paper 88-2672

T89-064 Evaluation of Thermal and Kinetic Properties Suitable for High Heating Rate Computations. I. Auerbach, D. A. Benson, S. G. Beard and G. F. Wright Jr., *Sandia National Laboratories* (3, 4, p. 395) Article based on AIAA Paper 87-1512

T89-065 VCHP Performance Prediction: Comparison of First-Order and Flat Front Models. R. P. Bobco, *Hughes Aircraft Company* (3, 4, p. 401) Article

T89-066 Space Cryogenics Components Based on the Thermomechanical Effect: Vapor-Liquid Phase Separation. S. W. K. Yuan and T. H. K. Frederking, *University of California, Los Angeles* (3, 4, p. 406) Article

T89-067 Predicting the Thermal Conductivity and Temperature Distribution in Aligned Fiber Composites. C. R. Havis, G. P. Peterson and L. S. Fletcher, *Texas A&M University* (3, 4, p. 416) Article based on AIAA Paper 88-2658

T89-068 Optimal Regularization of the Inverse Heat-Conduction Problem. D. M. Trujillo, *TRUCOMP*; and H. R. Busby, *Ohio State University* (3, 4, p. 423) Article

T89-069 Swaying Motion in Thermal Plume Above a Horizontal Line Heat Source. K. Noto, *Kobe University, Japan* (3, 4, p. 428) Article based on AIAA Paper 86-1266

T89-070 Laminar Natural Convection in a High-Aspect-Ratio Inclined Rectangular Duct. D. Majumdar, J. Y. Murthy and R. P. Roy, *Arizona State University* (3, 4, p. 435) Article

T89-071 Transient Cool Down of a Gas in a Closed Container. Jae Min Hyun and Ki Choi Hoon, *Korea Advanced Institute of Science and Technology* (3, 4, p. 441) Article

T89-072 Computation of Laminar Mixed Convection Flow in a Channel with Wing Type Built-in Obstacles. G. Biswas, N. K. Mitra and M. Fiebig, *Ruhr Universität Bochum, FRG* (3, 4, p. 447) Article based on AIAA Paper 88-2647

T89-073 Turbulent Mixed Flow of Free and Forced Convection Between Vertical Parallel Plates. Cha'o-Kung Chen and Chen-Ping Chiu, *National Cheng-Kung University, Taiwan, ROC* (3, 4, p. 454) Article

T89-074 Performance Evaluation of Multipassage Tubes for Laminar Flow Applications. H. M. Soliman, *University of Manitoba, Canada* (3, 4, p. 461) Article

T89-075 Thermal Boundary Layer Due to Sudden Heating of Fluid. K. R. Kurkal and S. Munukutla, *Tennessee Technological University* (3, 4, p. 470) Technical Note based on AIAA Paper 88-2745

T89-076 Structural Modification to Glass-Like Materials Under Laser Irradiation. D. E. Hastings, *Physical Sciences Inc.* (3, 4, p. 472) Technical Note

T89-077 Experimental Results for the Quasisteady Heat Transfer Through Periodically Contacting Surfaces. W. M. Moses, *Texas A&M University*; and R. R. Johnson, *North Carolina State University* (3, 4, p. 474) Technical Note based on AIAA Paper 87-1608

T89-078 Mixed Convection on a Horizontal Surface with Injection or Suction. Adnan Yücel, *Louisiana State University* (3, 4, p. 426) Technical Note
